Green IT Welcomes New Junior SCADA Engineer

PHILADELPHIA, Pennsylvania - Green IT Energy Applications is excited to announce Hayden Smith as its new Junior SCADA Engineer. Hayden's digital forensics and security analysis experience will be a major resource to Green IT and its clients. At Green IT, Hayden's responsibilities will range from monitoring SCADA resources, implementing security updates, provisioning new systems, and L2 support.

Prior to joining Green IT, Hayden was a Cyber Surety Specialist in the Air National Guard where he conducted vulnerability assessments, deployed telecommunications resources, and provided real-time intrusion detection for critical IT resources.

Hayden comments, "My interest in renewable energy began with a college class that shaped my understanding of the roles we individually and collectively play in shaping the natural environment. I'm excited to apply my knowledge of cybersecurity to a mission-driven organization devoted to facilitating a positive environmental impact."

Green IT CEO Andrew Eisenberg writes, "The persistent threat of cyber attacks on critical infrastructure is a challenge we're confident Hayden will be able to help us meet. Hayden's ANG career experience and his demonstrable commitment to continuous learning make him well suited to the renewable energy operations sphere."

Welcome, Hayden!

About Green IT

Green IT Energy Applications™ provides software solutions and comprehensive IT services for the renewable energy industry. Since 2002, Green IT has pioneered technology-driven strategies that optimize all stages within the lifecycle of an asset, from origination through planning, execution, operations, and asset management. Green IT's Smart Software catalog combined with our team's industry-specific expertise equip us to add value to assets of any size or class.
